LOOPA ENERGY

Save up to 15%

on your electricity bill.

With no upfront costs.

Loopa installs solar on your property free of charge.
You only pay for the energy you use from the system.

ILLUSTRATIVE ANNUAL SAVING*

₱13,824

600 kWh a month. 80% supplied by Loopa. An illustrative PHP 16.00/kWh utility rate, with 15% off Loopa energy.

A rate that tracks 15% lower.

Loopa's rate stays 15% below your current energy provider's rate per kWh. You pay only for the energy you use from Loopa.

Designed for your home.

We assess the right system size and setup, including battery and net metering options, to maximise your savings.

Your system, in view.

Loopa remotely monitors performance. You have ongoing live access to your system's energy data and savings.

Your utility connection stays in place.

Your existing utility supplier continues to supply any electricity the solar system isn't providing. You remain responsible for paying your utility bill as usual.

Apply online.

Prepare your recent electricity bills and apply at loopaenergy.com.

* Illustration assumes 7,200 kWh/year (600 kWh/month), 80% supplied by Loopa and used in your home, an illustrative Meralco rate of PHP 16.00/kWh and a 15% Loopa discount (PHP 13.60/kWh). This is an estimate, not a savings guarantee.

The 15% discount applies to Loopa energy you use. Overall bill savings depend on weather, the share supplied by the system, utility charges and actual use. Subject to site assessment and agreement.
